TECHNICAL SPECIFICATION FOR HONEY PROCESSING UNIT

Each processing unit having One no of stainless steel Pre-filter tank having thickness of 1.6 mm with volumetric, capacity of 250 Kgs along with 500 micron mesh, to remove visible impurities and also includes

1. **Gear Pump** : Made by M/s. Rotodel Company with full stainless steel body and gears. Basic output Capacity : 2500 lts/hour. It will be suitably reduced to give required output. Now we are using metering pump, we can discuss and install suiting your choice. Drive Motor : 0.5 H.P. 3 phase 440 VAL TEFC 1440 rpm make crompton or Seimens.
2. **Preheating Tank** : Made from 2.0 mm thick stainless with heater. This is helical coil heat exchanger, where honey is allowed to pass at controlled speed in SS pipe coil which is submersed in water bath at a controlled temperature, this is a process where we fully liquify the honey but get the wax to be soild to as it does not pass thru the filter .
3. **Microfine Filter** : Full stainless steel self locking high pressure filter which has poly propylene filters made of 40 micron size. We can filter upto 10 micron at almost same speed. We give 2 parallel filters so as not hamper the process even if 1 filter gets clogged.
4. **Processing Tank** : Made from 2.0 mm thick stainless sheet. This is a similar tank in design and construction, but we remove biological impurities here and de activate yeast at a very controlled temperature. We actually digitally control the water temp, and monitor honey temperatures to get the result. Crompton /Sharp/ Orient makes water circulation pumps 0.2 HP, mono block, with 18 m Head, 230 V AC, single phase mechanical seal.
5. **Falling Film evaporator** : Made from 3.0 mm thick stainless sheet, with concentric cone in side. Subjected to vaccum and ensuring Falling film, to evaporate moisture.
6. **Cooling Tank** : Made from 2.0 thick, stainless sheet, exactly same as pre-heating tank but without heaters.
7. **Settling Tank** : Made from 3.0 mm stainless steel sheet, top and bottom dished ends fully leak proof, bottom drain for honey withdrawal. Vacuum standing.
8. **Control Panel** : Having cut off MCB, control circuit fuses, and MCB in each time to protect the wiring, with Brass earthing bolt to prevent electric shocks.
9. **Water Ring Vaccum Pump** : 3.0 HP, 3000 rpm, 440 VAC, TEFC BHI / Kirloskar make with 550 + mm Hg. Vaccum. SS chassis made out of 75x40 MS Channel in two part.
10. Storage Containers (Plastic/Metal)
11. Centrifugal Honey extractor Machine and also installed Inverter.
